

Creating sound together

MERIDIAN

Prestigious British Audio, Meridian

Since 1977, Meridian has delivered innovative and elegant high-performance audio solutions. They have pushed boundaries, disrupted norms, and delivered products that have redefined how people enjoy their music and movies, wherever they are.

Meridian's Leading Technologies

Meridian's rigorous and research-led philosophy has maintained their position on the limits of what's possible in sound. As the Pioneer of High Resolution Audio and the Master of Digital Signal Processing (DSP), Meridian has played an integral role in the development and adoption of pioneering technologies.

Digital Signal Processing

DSP allows absolute control over the audio signal, enabling the design of advanced technologies that can enhance the listening experience in any context.

Meridian Lossless Packing

Meridian has been a long-term collaborator and technology partner with Dolby. Meridian Lossless Packing technology is licensed to Dolby as the standard for DVD audio.

Master Quality Authenticated

Meridian developed MQA - the revolutionary technology for efficiently streaming music with the highest possible sound quality. With MQA you can be sure that you're hearing exactly what the artist approved in the studio.

Elevate the party with lighting effects
